## Program Operation: Auditor's Checklist

## **Employer responsibility:**

When control of exposure to an occupational hazard requires the use of RPE, it is the responsibility of management to ensure a Respiratory Protection Program is implemented and maintained as an integral part of a risk control strategy. The program should contain the key elements outlined below. The result of the program should be that appropriate RPE is used in accordance with manufacturer's instructions and worn at all times.

| Management responsibilities  |
|--|
| Designation and role of the administrator  |
| RPE selection process  |
| Medical screening of RPE users   |
| Training in proper selection, usage, storage/disposal, inspection and maintenance of RPE |
| Issue of equipment   |
| <br>Fitting of equipment   |
| Fit testing of equipment to wearers  |
| Cleaning/disinfection or disposal of equipment   |
| Inspection, maintenance/repair if applicable   |
| Storage of equipment   |
| Record Keeping   |
| Program evaluation/auditing, and implementation of corrective actions                    |
|  |

## **Documented Policies and Procedures**

| Appointment of administrator   |
|--|
| Suitably qualified/experienced program administrator is selected and appointed   |
| Administrator's role is defined  |
| RPE Selection Process  |
| Selection is made by knowledgeable and experienced individuals   |
| Selection should be in compliance with AS/NZS 1716   |
| Limitations of RPE should be taken into account  |
| Work area conditions and employee's exposure must be assessed  |
| Respirators selected on basis of contaminant type, level of exposure, task and operator  |
| Medical screening/evaluation of prospective users has been made to determine<br>the their physical and psychological suitability to wear RPE   |
| Users are involved in the selection process to ensure fit and comfort  |
| RPE Training:  |
| Supervisors are trained in their responsibilities  |
| Employees are trained in proper usage, storage, and inspection of RPE. They must have demonstrated competency of use, inspection, maintenance (if applicable) and limitations of the RPE |
| Refresher training frequency is defined and established  |
| Training is provided by a competent provider   |
| Issue of RPE   |
| Exclusive use of respirators where practicable   |
| Respirators issued in a clean condition  |
| Exclusive use of respirators where practicable   |
| Respirators issued in a clean condition  |
|  |

| RPE Testing   |
|---|
| The RPE is properly fit tested at appropriate intervals   |
| Users who where corrective lens are properly fitted   |
| Wearers are trained to check RPE fit before each use  |
| Cleaning and Disinfection: Reusable RPE only  |
| System of regular cleaning, disinfection and maintenance established  |
| RPE to be cleaned and disinfected between any use by different people, i.e. when individual systems cannot be provided            |
| Proper methods of cleaning and disinfection are utilised  |
| Storage   |
| RPE to be stored to protect them from dust, sunlight, heat, excessive cold or moisture, or damaging substances                    |
| Respirators stored properly to prevent deformation  |
| Gas/vapour filters are stored in containers or bags with airtight seals   |
| RPE is stored close to where it will be used  |
| Inspection, Maintenance and Repair:   |
| RPE to be inspected before and after each use and during cleaning, (if applicable) in accordance with manufacturer's instructions |
| RPE to be inspected, maintained or repaired by trained or knowledgeable personnel   |
| SCBA designated for emergency use is inspected at least monthly, as well as after each use  |
| Replacement parts used in repairs are of the manufacturer of the respirator   |
| Repairs of SCBA are made only by authorised personnel in accordance with manufacturer's instructions                              |
